

Workshop on Big Data Analytics and Computing

Call for papers

Aim and Scope

The workshop on big data analytics and computing intends to provide a leading forum for disseminating the latest research in Big Data Research, Development, and Applications. The workshop also explores future trends and applications in these areas and other related areas. Your participation at the workshop would be an excellent opportunity to discuss the technology advancements. The 2013 National Computer Symposium (NCS 2013) will be held on December 13-14, 2013 at Asia University, Taichung, Taiwan.

Topic of Interest

Areas of interest include, but are not limited to, the following topics:

- Big data analytics
- Big data mining
- Big data architecture
- Big data management
- Data capture and storage
- Data visualization
- Big data toolkits
- Big data applications
- Algorithms, strategies and technologies for big data
- Cloud computing

- Big data open platforms
- Experimental, prototyping and implementation for big data analysis
- High performance/parallel computing platforms for big data
- Novel theoretical models for big data
- New computational models for big data
